

This is to urge you to reject the National Association of Broadcasters' petition number 04-160 and to support XM radio's ability to provide the kind of programming its customers request and are willing to pay for. I benefit from listening to XM Satellite Radio and its traffic and weather channels. These features, especially weather, are available when I am travelling nationwide and provide information not available on local stations. Further, Satellite radio provides service in many areas where no local stations are available. I am willing to pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear.
